

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 September 2026
Team ID	
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 10 minutes to prepare
 1 hour to collaborate
 2-8 people recommended

 **Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

A Team gathering
Shanmugam S (Team Lead), Aathithya, Logesh S and Ramanidharan S joined the session and shared their roles.

B Set the goal
Enforce accurate, consistent Incident data at the UI level using UI Policies and Client Scripts in ServiceNow.

C Learn how to use the facilitation tools
Followed the key rules of brainstorming: stay in topic, defer judgment and go for volume.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

PROBLEM

How might we ensure incident records are submitted with complete and valid data using UI Policies and Client Scripts?

Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.

 Defer judgment.

 Go for volume.

 Encourage wild ideas.

 Listen to others.

 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

Each team member listed ideas for how UI Policies and Client Scripts can enforce clean Incident data.

Shanmugam S (Team Lead)

Create UI Policy 'High Impact Control' on Incident

Make Assignment group mandatory for High impact

Set Urgency read-only with a UI Policy action

Use Reverse if false to undo changes

Aathithya

onChange script to auto-set Urgency to High

onCellEdit script to block State edits in list

Show info message when Urgency is auto-set

Alert users to open the Incident instead

Logesh S

onSubmit script to stop save if Assigned To is empty

Show an error box on the Assigned To field

Test mandatory enforcement

Test a form-based State update

Ramanidharan S

Test successful save with Assigned To filled

Reverse condition test: High to Medium

Document every task with screenshots

Write the conclusion and summary

3 Group ideas

Similar ideas were clustered together and each cluster was given a sentence-like label.

🕒 20 minutes

Control field behavior with UI Policies

High Impact Control UI Policy

Assignment group mandatory

Urgency read-only for High impact

Reverse if false to auto-revert

Automate and validate on the client side

onChange: auto-set Urgency

onSubmit: block save without Assigned To

Error box on Assigned To

Info message on Urgency update

Protect data in list views

onCellEdit: block State edit in list

Alert: open the Incident to update State

Test and verify the configuration

Test mandatory enforcement

Test successful save

Reverse condition test

Test list edit blocking

Test form-based update

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
